

Gas analyzer

Description

Gas analyzers detect leaks or increased levels of hazardous substances in the air. The data analysis and the complex index allow to control the air pollution degree..

General features

Number of analytical channels

4-16

Detected gas concentration range

0.01 to 1000mg/m³

Cameras

FPV and course

Video stream resolution

1280x720 (HD)

On-board recording

1920x1080 (Full HD) to a removable media
